

```

week1 > JS index.js
3 // add two numbers
4 const sum = num1 + num2;
5 const sum2 = num1 * num2;
6 const sum3 = num1 - num2;
7 const sum4 = num1 / num2;
8 // display the sums
9 console.log('The sum of addition' + num1 + ' and ' + num2 + ' is: ' + sum);
10 console.log('The sum of multiplication' + num1 + ' and ' + num2 + ' is: ' + sum2);
11 console.log('The sum of taking away ' + num1 + ' and ' + num2 + ' is: ' + sum3);
12 console.log('The sum of division' + num1 + ' and ' + num2 + ' is: ' + sum4);

```

```

Problems Output Debug Console Terminal Ports
@raresbogdan47-eng →/workspaces/CN5006_2517981_lab_4 (main) $ cd week1
@raresbogdan47-eng →/workspaces/CN5006_2517981_lab_4/week1 (main) $ node index
The sum of addition5 and 3 is: 8
The sum of multiplication5 and 3 is: 15
The sum of taking away 5 and 3 is: 2
The sum of division5 and 3 is: 1.6666666666666667

```

Conclusion: It is very important to make sure that you are in the right depository as if you are not, your file will not work. Reusing code helped me a lot with making of this program, I reused the “const sum = num1 + num2;” command to quickly make the other 3 sums. When running my code, I typed in node index and made sure that I was in the right depository by typing cd week1 in the terminal. My code ran without any issues, and the terminal results are displayed in the screenshot above.

```

The sum of 5 and 3 is: 8
PS C:\Users\hp\CN 5006_4\week 1>

```

This is the input for exercise 2, I made sure to reroute the depository to cd CN_5006_4\week_1\, then typed in node index which helped me run my code.
